Hello, I'm Akhil Vijay!

'I consider the Post Graduate Programme in Business Administration at the Indo-German Training Center Bangalore as a breakthrough in my life after the engineering phase. I joined this programme mainly because it is the only one which provides you an internship during your studies. As the internship is provided by German companies in India it adds value to your process of learning. My internship at Kronos India Pvt. Ltd gave me a broad outlook of the corporate world. The professors and class environment are also fabulous and the dual system of education gives you the practical exposure needed in your learning.'
