Hello, I'm Gautam!

"I quit my job at Bosch Ltd with an entrepreneurial mindset. Though confident, I was hit by harsh realities of starting a business. I needed time to enhance my skillset and bounce back with better ideas and plans to execute. Choosing IGTC was the best option for me as course structure is intense, face-paced, covers all the major topics of all the management subjects. The faculty is skilled, knowledgeable and experienced; every class is a brainstorming session for me. Internships provide me a chance to revisit corporate life and rethink about being an employee again. Capstone project at the end of the course aids to come up with a proper business plan. With "Start-up" being the buzzword from IGCC president's speech in recent convocation ceremony of our seniors, I am looking forward to explore and make most of the opportunities ahead."
