Hi, I'm Guruprasath!

*'I'm a mechanical engineer. Asked about your company of choice, as a mechanical engineer, you can usually only think of one of German origin. Having the chance to work in a multinational company after my PGPBA would be an opportunity of a life time.*

*I know it is thanks to IGTC's PGPBA course structure that I have the opportunity to work with Robert Bosch Automotive Electronics, India. Working with experts from all around the world, thereby, learning from their experiences and implementing the concepts is the best for any mechanical engineer.'*
