Hi, I'm Samir Sahu!

"After engineering, construction job and a career going nowhere, I felt like I should go for a change and was looking for MBA colleges. Then I came across IGTC which offered me the best curriculum along with an internship with CLAAS India at Punjab. I took the course and here I am, after 10 months of commencement of class including an internship period of 3 months. I feel confident and looking forward to learn more as I know whatever I learn here in classroom, I can apply the same in the next internship phase. IGTC and its curriculum are well designed to develop one's confidence and talent and get people ready for the corporate careers."
