

## #insight4u

Hi my name is Venkataraman Mahalingam, PGPBA Batch 2015-2017!

*“In a span of eight years of education, I have found most students only aiming for a high score. Although great marks are supposed to indicate lots of knowledge, only thriving for a high score usually gives us less knowledge instead. Rarely do students find some real time applications to everything they have learnt during their studies. After my internship at Robert Bosch GmbH, as a fellow student, I can tell you that IGTC has a very practical approach. With IGTC’s unique PGPBA course nothing you have learnt stays unimplemented.*

*And stopping at that seems like describing only one aspect or one side of a coin. Learning being one side, our companions are our second one. With friends who come and go, at every stop of your life you see only a few friends that stick with us. I know now that I have made more of those friends at IGTC Bangalore than at any other point in my life. I thank IGTC for the opportunity to experience both sides of that coin.”*
