Hi, my name is Yudhishtir, PGPBA Batch 2015-2017!

“Quitting my job at Bosch Limited and getting back to studies was a very difficult choice to make. I heard about IGTC from my colleagues at Bosch who were alumni of IGTC. Although I was initially sceptical about the course as it is not recognized by AICTE, I felt the positives outweighed the negatives and I decided to join the course. Now I feel it was the right thing to join IGTC. Compared to all the other MBA programs offered at other colleges, the German Dual Education system attracted me the most, since my very first corporate world exposure was at BASF Mangalore, which is also a large German Multinational.

Moreover, I am able to connect the management subjects taught at IGTC to my learning from work. The professors are highly qualified and the education system gives us a practical learning experience with internships which helps us to relate theory with practice.

It was a new experience for me sharing the classroom with people of different backgrounds and cultures, as neither my graduation nor my previous work environment had such great diversity.

Interning with Festo India, a large German MNC, is a great opportunity for me. I feel happy to be a part of the Supply Chain and Logistics team. I look forward to learn as much as possible from the vastly experienced staff. All in all, I would like to thank IGTC for this memorable experience.”
