#insight4u

Hi, my name is Dhananjay!

I am an engineer and I was looking for a management specialization course which makes engineering also worthwhile.

Taking up the IGTC course made all my expectations come true. As it is a Dual Education system it offers you theory as well as practical learning experience which builds a solid foundation of management studies. The teachers are exceptionally good and take keen interest in explaining complex topics.

Although I already have work experience my internship at FESTO INDIA PVT LTD helped me to understand the workings of MNCs and to be patient and get the task done. As it's well said patience is not the ability to wait but how you act while waiting.
