Hello, I'm Amithavikrama A V!

“My key intention for engaging with IGTC Bangalore was the great opportunity it provided to aspiring enterprising graduates. As I had a keen desire to enrich my knowledge in both the management and financial skill it was possible through German dual education system. I weighed out my options and found that the value was more than what a normal MBA programme offered.

Once qualifying the IGTC entrance test and group interviews, I was enthralled to carry out the joining formalities and pulling off internship interviews. I was given an opportunity to get inducted into one of the leading worldwide supplier of automation technology and the performance leader in industrial training Festo India Private Limited. We finished our first phase of PGPBA with the top class faculty who prepared us for our first phase internship. After completing my first cycle programme (internship + Phase 1), I believe this was the accurate place for my career. Our manager was happy for the Value addition which we contributed to the company backed by the theoretical knowledge which we received at IGTC. I am looking forward to the second phase of my internship starting in August-2018.

My Suggestion to my friends looking for enhancing their Management Skill would be that IGTC Bangalore is providing a learning experience of Industrial environment involving both traditional and contemporary experience from day one, prioritizing intense significance to business values in Indian market with Indo-German culture.

Thank You!”
