Hello, I'm Charvi Singh!

"I decided to apply for the Post Graduate Programme in Business Administration (PGPBA) because it helps me to enhance my studies and my future opportunities. Attending the PGPBA from IGTC provides me a broad scope, e.g. by focusing on German language or by helping me to gain experience by working on live projects at the assigned companies.

Furthermore, it gives me the opportunity to get in touch with the German work culture and to achieve the intercultural learning that I desire and need. The curriculum fascinates me because it comprises diverse and unique modules along with a broad focus on entrepreneurship. I especially appreciate the fact that subjects such as human resource management, business communication, business ethics and corporate governance are also part of the curriculum. They will help me to take my career to the next level.

The experience at IGTC is filled with excitement and fun and it will not just help me to boost my individual potential, but also be valuable for my studies and my general development."
