Hi, I'm Dibyajyoti Saikia!

"I've always wanted to take a management course after my graduation. I chose IGTC because the programme involves exposure to German culture through the German dual education system.

The professors here are highly qualified and help us to get a practical learning experience of the business environment and to prepare ourselves to be managers in the future.

Six months down the line, I've completed the first phase of the programme and was also able to apply what I've learned in class during my internship in one of the top German companies, Bosch Ltd. I'm glad that I've made the right choice to be a part of IGTC."
