Hello, I'm Rohit Salokhe!

"I'm very thankful for being a part of IGTC Bangalore. Before I joined IGTC, my plan was to do my Master's in Germany, which unfortunately was not possible. Afterwards, I was searching for a platform where I can get a chance to work with German organisations. One of my friends, who did his Post Graduate Programme in Business Administration (PGPBA) at IGTC and is working with Bosch in Bangalore, told me about the programme. He explained me how you are provided with theoretical management knowledge from a faculty with huge working experience with bigger organisations. Also, they provide you with knowledge about work culture in German organisations and even an internship in a German MNC.

This programme was just what I was looking for. I learned about the work culture in a German company during my internship with Komet Precision Tools India Pvt Ltd, which will be helpful for my career. Also, I hope having attended this programme will get me a chance to go to Germany.

Thank you, IGTC Bangalore!"
