Hello, my name is Sachin Kumar Pandey!

“At first, I was planning to do a PG to get a better job and a better future. I started looking for colleges and I came to know about IGTC through one of my college friends. Afterwards, I started gathering more information about IGTC.

I came to know about the dual education system of IGTC, which no other college is providing. In this dual education system, IGTC offers internships in top German MNCs for six months and 12 months of studying different subjects as well as one foreign language, everything taught by a top class faculty.

The six-month internship will help me to understand the work flow of a company and also to better understand the subjects learned during the course. I also talked to some previous batch students about IGTC and I was impressed by the information they gave me.

This unique course was much better than any other courses provided by different colleges.

That's why I joined IGTC Bangalore.”
